DIVYANSH AWASTHI

Lucknow, Uttar Pradesh | +91 9528545302 | divyanshawasthi90@gmail.com | LinkedIn | GitHub | Portfolio

Computer Engineering student and AI/Full-Stack Developer specializing in **Data Science** and scalable web applications. Experienced in developing predictive models, backend APIs (Next.js/FastAPI), and AI integrations including **LLMs, Multi-Agent Systems, RAG**, and asynchronous task processing.

TECHNICAL SKILLS

AI & DATA SCIENCE
Generative AI (Gemini, OpenAI, Anthropic), LangGraph, Hugging Face, **RAG**, LangChain, TensorFlow, PyTorch, Scikit-learn, NLP, Computer Vision, Vector Search

BACKEND & SYSTEMS
FastAPI, Node.js, Express.js, PostgreSQL (RLS, pgvector), Redis, Celery (Task Queues), SQLite, WebSockets, REST APIs, Microservices

WEB DEVELOPMENT
Next.js (14–16), React 19, TypeScript, JavaScript, Tailwind CSS 4.0, Three.js (React Three Fiber), GSAP, Framer Motion, Lenis, HTML5/CSS3

LANGUAGES & TOOLS
Python (Advanced), C++, SQL, Docker, Git/GitHub, Playwright, Linux, Vercel, Render, CI/CD

PROFESSIONAL EXPERIENCE

AI & Full-Stack Developer Intern | Dr.Tracker (Wellness Platform) — Sep 2026 – Nov 2026 | Remote

- Designed and implemented the end-to-end **AI chatbot architecture**, orchestrating conversational workflows and contextual prompt pipelines for healthcare user interactions.
- Developed an automated **email outreach system** with event-driven scheduling to handle user communication and onboarding workflows reliably.
- Designed responsive UI/UX interfaces and refined frontend workflows to ensure intuitive navigation and visual consistency across the platform.

AI Engineering Intern | Zerzura Studios Pvt. Ltd. — Jul 2026 – Nov 2026 | Remote

- Engineered an end-to-end multi-agent AI generation pipeline using **LangGraph** & **FastAPI**, implementing parallel execution, QA rework loops, checkpointing, and crash recovery.
- Implemented real-time **WebSocket streaming** with Redis state updates, automated QA evaluators, and unified LLM abstractions across OpenAI, Anthropic, Google, Groq, and Ollama.
- Developed persistence layers with **PostgreSQL/pgvector** and built website analysis tooling using Playwright & vision models to transform existing sites into structured context.

Full-Stack Web Developer | Mowglai.com (Startup) — Dec 2025 – May 2026 | Remote

- Built and deployed a responsive **Next.js 16** frontend with interactive 3D elements (**Three.js**) and GSAP animations for modern user experiences.
- Implemented Server-Side Rendering (SSR) to optimize page loading performance and streamlined data flow from Figma designs to PostgreSQL databases.

FEATURED PROJECTS (AI & SYSTEMS ARCHITECTURE)

GET IT! | Recruitment Intelligence Ecosystem — Next.js · FastAPI · Python · SQLite · Gemini 2.0

https://div0011.github.io/AI-POWERED-RESUME-ASSISTANCE/

- Built a model-rotation API layer with automated failover across Gemini models to mitigate rate limits and ensure service reliability.
- Developed a hybrid candidate ranking engine combining semantic vector similarity scoring with structured keyword filtering for resume screening.

GUARD IT! | Multi-Tenant AI Content Moderation SaaS — FastAPI · Next.js · PostgreSQL · Redis · Celery · Docker

https://div0011.github.io/GUARD-IT/

- Implemented multi-tenant data isolation and security policies using PostgreSQL Row-Level Security (RLS).
- Designed an asynchronous moderation pipeline with Celery task queues and fallback routing for low-latency text and image classification.

STORE IT! | AI Document Storage — React · FastAPI · Gemini 2.5 Flash · AES-256 Encryption

https://div0011.github.io/STORE-IT-/

- Built an AI-assisted document ingestion pipeline using Gemini 2.5 Flash for OCR text extraction and automated file categorization.
- Secured file storage with client-side AES-256 encryption and automated PII detection to identify sensitive data before persistence.

LeadGenius | Automated Outreach Pipeline — FastAPI · Celery Beat · PostgreSQL · SMTP/IMAP

https://lead-gen-iota-flame.vercel.app/

- Engineered a scalable outreach automation pipeline using Celery Beat and Redis for scheduled email delivery and bounce handling.
- Integrated email sentiment classification to categorize inbound replies and prioritize high-intent responses for follow-up.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech) in Computer Science Engineering | Babasaheb Bhimrao Ambedkar University, Lucknow — 2024 – Present

Certifications & Ongoing Studies: Data Science with Generative AI (PW Skills) • Data Structures and Algorithms with Python

- Advanced Web Frameworks (Next.js 16, React 19, Full-Stack Architecture)
