DIVYANSH AWASTHI

Lucknow, Uttar Pradesh | +91 9528545302 | divyanshawasthi90@gmail.com | LinkedIn | Github

OBJECTIVE

Computer Engineering undergraduate and AI-focused developer specializing in bridging Data Science with scalable Full-Stack architecture. Passionate about engineering autonomous systems, predictive modelling, and agentic workflows. Currently advancing expertise through specialized certifications in Data Science with Generative AI and modern web ecosystems, with a proven track record of architecting production-level applications.

SKILLS & ABILITIES

- **AI & Data Science:** Generative AI (Gemini 1.5/2.0, OpenAI), Hugging Face (all-MiniLM-L6-v2), RAG, LangChain, TensorFlow, PyTorch, Scikit-learn, NLP, Computer Vision.
- **Web Development:** Next.js (14-16), React 19, TypeScript/JavaScript, Tailwind CSS 4.0, GSAP, Framer Motion, Three.js (React Three Fiber).
- **Backend & Architecture:** FastAPI, Node.js, Express.js, PostgreSQL (Row-Level Security), Redis, Celery (Task Queues), SQLite (Vector Search).
- **Languages & Tools:** Python (Advanced), C++, SQL, Docker, Git/GitHub, Linux, Vercel, Render.

EXPERIENCE

- **Full-Stack Web Developer | Mowglai.com** (Startup) *December 2025 – Present*
  - **Architecture & Deployment:** Designed and deployed a complete Next.js 16 web ecosystem from scratch, translating business requirements into a high-performance React application featuring interactive 3D elements (Three.js) and GSAP animations.
  - **Performance Optimization:** Engineered a server-side rendering (SSR) architecture that reduced initial load times by 40% and optimized the platform for scalable SEO acquisition.
  - **Product Ownership:** Managed the full product lifecycle from UI/UX design in Figma to backend database management, ensuring zero technical debt upon launch.

- ### FEATURED PROJECTS (AI & Systems Architecture)
  - **GUARD IT! | Multi-Tenant AI Content Moderation SaaS** *Tech Stack: FastAPI, Next.js, PostgreSQL, Redis, Celery, Docker, Hugging Face*
    - Architected a fully asynchronous, multi-tenant Safety-as-a-Service platform capable of ingesting content at API speed and delivering webhook verdicts.
    - Implemented strict Row-Level Security (RLS) in PostgreSQL and engineered a robust fallback router between Hugging Face and OpenAI models to ensure zero downtime.
    - Solved complex race conditions using Docker health check contracts for seamless cross-container orchestration.
  - **GET IT! | Autonomous Recruitment Intelligence Ecosystem** *Tech Stack: Next.js, FastAPI, Python, SQLite (Vector DB), Gemini 2.0*

        - Engineered a fail-safe hierarchy with a 400% AI redundancy layer, automatically rotating through 4 Gemini model tiers to handle quota limits and ensure 99.9% uptime.
        - Built a custom semantic "Gap Map" using local Hugging Face embedding models (384-dimensional vectors) for millisecond-scale candidate similarity scoring.
        - Designed an Explainable AI (XAI) engine utilizing a 60/40 hybrid constraint-to-vector scoring system to generate qualitative candidate "Mission Briefs."
    - **STORE IT! | Zero-Knowledge AI Document Storage** *Tech Stack: React, FastAPI, Gemini 2.5 Flash, AES-256 Encryption*
        - Developed a distributed file storage vault utilizing custom file sharding and AES-256 encryption across multiple simulated nodes.
        - Integrated Gemini 2.5 Flash for RAG-powered semantic search, allowing users to query document contents naturally via a "Vault Chat" interface.
        - Implemented automated real-time OCR and PII (Personally Identifiable Information) detection to calculate document sensitivity scores.
    - **LeadGenius | Automated Generation & Outreach Pipeline** *Tech Stack: FastAPI, Celery Beat, PostgreSQL, SMTP/IMAP*
        - Built a 24/7 background automation engine utilizing Celery workers and Redis to handle concurrent scraping, validation, and email dispatch tasks.
        - Engineered an automated IMAP monitoring system to parse incoming replies, extract sentiment, and update lead status dynamically.

EDUCATION

- **Bachelor of Technology (B.Tech) in Computer Science Engineering** *Babasaheb Bhimrao Ambedkar University, Lucknow (2024 – Present)*
    - **Professional Certifications & Ongoing Studies:**
        - **Data Science with Generative AI** (PW Skills)
        - **Data Structures and Algorithms with Python**
        - **Advanced Web Frameworks** (Next.js 16, React 19, Python, Full-Stack Architecture)
