

DIVYANSH AWASTHI

Lucknow, Uttar Pradesh | +91 9528545302 | divyanshawasthi90@gmail.com | [LinkedIn](#) | [Github](#)

OBJECTIVE

Computer Engineering undergraduate and AI-focused developer specializing in bridging Data Science with scalable Full-Stack architecture. Passionate about engineering autonomous systems, predictive modelling, and agentic workflows. Currently advancing expertise through specialized certifications in Data Science with Generative AI and modern web ecosystems, with a proven track record of architecting production-level applications.

SKILLS & ABILITIES

Category	Technologies / Tools
AI & Data Science	Generative AI (Gemini 1.5/2.0, OpenAI), Hugging Face (all-MiniLM-L6-v2), RAG, LangChain, TensorFlow, PyTorch, Scikit-learn, NLP, Computer Vision
Web Development	Next.js (14–16), React 19, TypeScript/JavaScript, Tailwind CSS 4.0, GSAP, Framer Motion, Three.js (React Three Fiber)
Backend & Architecture	FastAPI, Node.js, Express.js, PostgreSQL (Row-Level Security), Redis, Celery (Task Queues), SQLite (Vector Search)
Languages & Tools	Python (Advanced), C++, SQL, Docker, Git/GitHub, Linux, Vercel, Render

EXPERIENCE

- **Full-Stack Web Developer | [Mowglai.com](#) (Startup)** *December 2025 – May 2026*
 - Designed and deployed a complete **Next.js 16 ecosystem** with interactive 3D (Three.js) and GSAP animations, translating business goals into high-performance UI.
 - Engineered **SSR architecture** reducing load times by 40% and led end-to-end product delivery from Figma UI/UX to backend database management.
- **Featured Projects (AI & Systems Architecture)**
- **[LeadGenius](#) | Automated Generation & Outreach Pipeline**
FastAPI · Celery Beat · PostgreSQL · SMTP/IMAP
 - Built a **24/7 automation engine** using Celery workers + Redis for concurrent scraping, validation, and email dispatch.
 - Implemented **IMAP sentiment parsing** to classify replies and update lead status dynamically.
- **[GUARD IT!](#) | Multi-Tenant AI Content Moderation SaaS**
FastAPI · Next.js · PostgreSQL · Redis · Celery · Docker · Hugging Face
 - Built an **asynchronous Safety-as-a-Service** platform with webhook verdicts and strict PostgreSQL RLS for secure multi-tenant data isolation.
 - Devised a **fallback router** between Hugging Face and OpenAI models with Docker-based health contracts to eliminate downtime.

- **GET IT! | Autonomous Recruitment Intelligence Ecosystem**
Next.js · FastAPI · Python · SQLite (Vector DB) · Gemini 2.0
 - Created a **400% AI redundancy layer** rotating across Gemini tiers for 99.9% uptime and quota resilience.
 - Developed a **semantic “Gap Map”** and hybrid XAI engine combining constraint and vector scoring for qualitative candidate briefs.
- **STORE IT! | Zero-Knowledge AI Document Storage**
React · FastAPI · Gemini 2.5 Flash · AES-256 Encryption
 - Engineered a **distributed file vault** with AES-256 sharding and RAG-powered semantic “Vault Chat” search.
 - Integrated **real-time OCR + PII detection** to compute document sensitivity scores automatically.

EDUCATION

- **Bachelor of Technology (B.Tech) in Computer Science Engineering** *Babasaheb Bhimrao Ambedkar University, Lucknow (2024 – Present)*
 - **Professional Certifications & Ongoing Studies:**
 - **Data Science with Generative AI** (PW Skills)
 - **Data Structures and Algorithms with Python**
 - **Advanced Web Frameworks** (Next.js 16, React 19, Python, Full-Stack Architecture)
